- Keep **0** on Trail to disable Auto Trail , Manual Trail , Total SI , Total Target , Max Loss per day
- On orders , click on SL or target value to modify it , or click the + , - near the SL or target to trail by 1 points.

- Click on Settings Value to manually modify values like Quantity , SL , target ,trail etc.

AUTO TRAIL

Example : Buy order , Average price at 100

SL is set to 96

Trail is set to 5

LTP is 99 - Nothing happens to SL at 1 points loss

LTP is 104 - Nothing happens to SL at 4 points profit

LTP is 105 - SL will be changed from 96 to 100 (LTP - Trail)

LTP is 106 - SL will be changed from 100 to 101 (LTP - Trail)

LTP is 105 - Nothing happens

LTP is 107 - SL will be changed from 101 to 102 (LTP - Trail)

LTP is 103 - Nothing happens

LTP is 102 - Positions Gets squared off

Keep the Trail value to 0 to disable it

M TRAIL

Example : Buy order , Average price at 100

SL is set to 96

M Trail is set to 2

LTP is 99 - Pressing M will modify SL to 97

LTP is 104 - Pressing M will modify SL to 102

Formula : $LTP - M\ trail = new\ SL$

M Trail is set to 3

LTP is 100 - Pressing M will modify SL to 97

LTP is 105 - Pressing M will modify SL to 102

BREAKEVEN

Buy order , Average price at 100

SL is set to 96

ANY LTP - Pressing B will modify SL to 100

Other Important things to keep in mind

- Always verify your open positions in broker and oneclick trader
 - If you closed oneclick trader accidentally , exit positions from your broker web or mobile app manually.
 - When positions are open , don't change the strikes/scrips before squaring-off current positions.
 - If you press space bar and clear open positions , make sure to exit them from broker.
-
