

Rules For Zones

1. Price moves quicker outside zones
2. Price moves slower inside zones
3. Zone top acts as resistance
4. Zone bottom acts as support
5. If Zone top breaks above , you can buy
6. If zone bottom breaks below , you can sell.
7. Bigger the blank space , bigger the reward.
8. Acts like same price action with pullbacks , reversals and retracement.
9. Option sellers can sell options when both call and puts are below thick zones.
10. Options buyers can buy outside the zones..and if market in range bound you can sell on zone top and buy on zone bottom.

FAKE BREAKOUT VS REAL BREAKOUT

Mostly breakouts fail if price had good momentum , price will stop only after sometime , So don't think this is breakout.

Real breakouts mostly happens when prices breaks After price spends some time on zone top.
